

Operational Due Diligence
World Class Expertise

Providing Insight and Reducing Risk

Virrata provides the insight you require to make appropriate investment decisions and minimise risks in your potential acquisitions.

We have extensive experience of working with companies around the globe, allowing us to support you in seeing the true state of operations, to avoid embedded risks and take advantage of hidden opportunities.

An Operational Due Diligence assessment would result in a full and comprehensive report tailored to your needs, the business type and investment fund.

We would determine your needs in advance and can deploy our team at short notice.

A tailored report may include;

- Deep insight in to capacity, costs, potential cash liberation, customer service and culture
- Operational compliance and deviation from the prospectus
- Performance benchmarking, processing and materials handling efficiency.

- Condition of operational areas and maintenance of the major assets
- Policies and regulatory compliance (inclusive of safety, environmental, and business continuity)
- Management organisational efficiency and effectiveness
- Security

In addition to seeking out possible negative effect issues, the assessment will highlight areas where significant improvements can be made and value liberated.

Virrata can help you understand what steps would need to be taken to maximise gains post acquisition and can support you throughout implementation.

Expertise

We have extensive expertise and experience in assessing operations around the globe

Insight

Deep insight can be gained in a surprisingly short period. We can also help you deliver transformational performance, post-acquisition

Results

Our advice helps you reduce risks and make the right investment decisions

About us

Virrata uses tried and tested methods to assess operational performance; delivering innovative solutions to complex problems.

We work with clients across the globe to develop and implement operations strategies. We can assess the maturity of your operations, review alignment with other areas of the organisation and help you to outperform competitors. Our work results in improvements to your top and bottom lines. Returns on investments are maximised through identification of quick wins and big gains.

Ignite your acquisition process
